

Name:
Ally Cui

Primary identity:
UI/UX & Interaction Designer

Secondary strengths:
Game design, creative technology, implementation awareness

Core ethos:
I design thoughtful, playful, and clear interactive experiences
by turning complex systems into interactions that feel easier
to understand, navigate, and enjoy.

Featured projects:
STYLIST
Export to Reality

Visual direction:
Minimal editorial foundation + controlled creative personality

Homepage structure:
Hero → Featured Work → Short About / Employment Interests → Contact CTA

Additional choices:
No experiments section
Separate Work page included
Portrait included, likely subtle on homepage and fuller on About page

1. Home — **index.html**

Purpose

Introduce Ally Cui quickly as a UI/UX and Interaction Designer, communicate the portfolio ethos, and guide visitors toward the two featured projects.

Required Sections

Header

- Ally Cui wordmark / name
- Primary navigation:
 - Home
 - Work
 - About
 - Contact
- Mobile menu button for smaller screens

Hero

- Name: Ally Cui
- Professional title: UI/UX & Interaction Designer
- Core ethos:
 - “I design thoughtful, playful, and clear interactive experiences by turning complex systems into interactions that feel easier to understand, navigate, and enjoy.”
- Supporting line:
 - “Working across mobile products, games, and creative technology.”
- Primary call to action:
 - View My Work
- Secondary visual:
 - Optional portrait or carefully selected project image

Featured Work

- STYLIST project card
- Export to Reality project card
- Link to full Work page

Short About / Employment Interests

- Short introduction
- Interests:
 - UI/UX Design
 - Interaction Design
 - Product Design
 - Game Design / Game UX
 - Creative Technology
- Link to About page

Contact Call to Action

- Short invitation to connect
- Email and LinkedIn link

Footer

- Style Guide

2. Work — work.html

Purpose

Present Ally's selected work in a clear, skimmable format and demonstrate reusable project-card components.

Required Sections

Page Introduction

- Heading: Selected Work
- Short sentence explaining the work:

- “A selection of interactive design projects across mobile products and collaborative game systems.”

Project Grid

- STYLIST project card
- Export to Reality project card

Each project card includes:

- Project image
- Project category
- Project title
- Short summary
- Role
- Year
- Accessible project link

Footer

- Same reusable footer as every other page
-

3. STYLIST Case Study — stylist.html

Purpose

Show Ally's UI/UX, interface-design, implementation, and iteration skills through one detailed process analysis.

Required Sections

Project Hero

- Project title: STYLIST
- Category: Mobile UX / React Native
- Year
- Role
- Main project image or device mockup
- Short overview

Project Context

- What STYLIST is
- What problem it addresses
- Team context, if applicable
- Ally's role

Challenge

- The original interface or interaction problem
- Why it was difficult or confusing for users

Process and Iteration

- Early approach
- What did not work
- Design decision(s) made
- Evidence:
 - Early interface screenshot
 - Revised interface screenshot
 - Optional wireframe / design-system artifact

Final Outcome

- Final interface screenshots
- Key interaction or visual improvements
- Technical implementation note

Reflection

- What Ally learned
- What would be improved next time

Related Project Link

- [Next Project: Export to Reality](#)

4. Export to Reality Case Study — [export-to-reality.html](#)

Purpose

Show Ally's game-design, interaction-system, collaboration, iteration, and creative technology skills.

Required Sections

Project Hero

- Project title: Export to Reality
- Category: Co-op Game Design / Interactive Systems
- Year
- Role
- Main gameplay image or visual artifact
- Short overview

Project Context

- What the game is
- What experience it aims to create
- Team context
- Ally's role

Challenge

- The major interaction or co-op design problem
- Why the system could become confusing, unbalanced, or difficult to understand

Process and Iteration

- Early mechanic, level, interface, or screen-design decision
- What testing or feedback revealed
- Changes made to improve clarity, pacing, or collaboration
- Evidence:
 - Gameplay screenshots
 - UI or level-design artifacts
 - Before/after visual comparison
 - Optional sketches or system diagrams

Final Outcome

- Final gameplay / interaction examples
- What the revised design achieved

Reflection

- What Ally learned about game interaction, co-op systems, or player communication
- What would be improved in a future iteration

5. About — [about.html](#)

Purpose

Give employers a concise, personal, professional explanation of who Ally is and what kinds of roles she is seeking.

Required Sections

About Introduction

- Professional portrait
- Bio of no more than 100 words
- Clear relationship to the portfolio ethos

Employment Interests

- UI/UX Design
- Interaction Design
- Product Design
- Game Design / Game UX
- Creative Technology

Design Values

- Thoughtful
- Playful
- Clear
- Iterative
- System-aware

Skills / Tools

- UI/UX Design
- Figma
- HTML / CSS / JavaScript
- React Native

- Interaction Design
- Game Design
- Visual Design
- Git / GitHub

Contact Prompt

- Link to Contact page
-

6. Contact — `contact.html`

Purpose

Make it easy for an employer or collaborator to reach Ally.

Required Sections

- Heading: Let's Connect
 - Short professional invitation
 - Email link
 - LinkedIn link
 - GitHub link
 - Optional simple contact form only if there is enough time to make it fully accessible and functional
-

7. Style Guide — `style-guide.html`

Purpose

Document the visual system and coded components used throughout the portfolio.

Required Sections

- Portfolio ethos and visual direction
- Colour palette
- Typography scale
- Spacing system

- Grid system
 - Buttons and links
 - Navigation
 - Project cards
 - Image treatment
 - Form components
 - Focus states
 - Responsive behavior
 - Atomic Design map
 - CSS code samples
-

8. Citations — citations.html

Purpose

Credit external tools, fonts, icons, image sources, frameworks, and code references.

Required Sections

- Fonts
- Icons
- External images, if any
- Libraries or scripts, if any
- Tutorials or code references
- AI tools, if required by the course policy
